

do you... feel small?

Your own penis will look smaller to you than to others because you are looking down at it, and it's what you do with it that really counts!

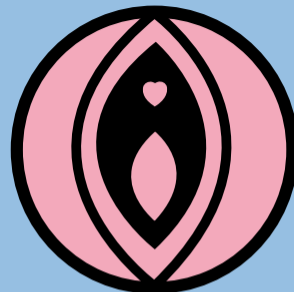

do you play... with toys?

Sex toys need to be washed, or covered with a new condom every time you share or move from anus to vagina.

do you... fantasise?

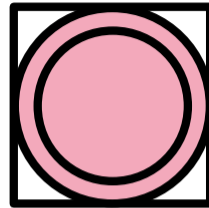

Talking about what you like can increase your confidence when negotiating safer sex. Do you tell your partner your fantasies?

do you... feel pleasure?

The clitoris runs all the way from the pubic bone to the anus; it has a high concentration of nerve endings and exists solely for pleasure.

do you choose it?

safer sex
